

TECHNICAL DATA SHEET - GREENTEX

hining powder for green marble

COMERCIAL NAME: GREENTEX

USE: hining powder for green marble

DESCRIPTION: The GREENTEX - Shining powder for green marble floors has the same shining capacity as GIALOTEX powder for coloured marble, but it is specially recommended for obtaining the best results on green marbles, leaving a brilliant finish and enhancing the green tone of the surface.

COMPOSITION:

Salts and waxes

APPLICATIONS:

high intensity polishing specially formulated for green marbles

HOW TO USE:

The surface has to be clean and dry. Do not dilute or mix with other products. Pour a little quantity of the product (approx. 20gr.x sq.mt.) Over an area of about 2 sq.m. And add a little of water. Buff with the polishing machine fitted with a white pad and spread the paste over all the area to be treated. Gloss will appear while the paste is dissolved by buffing. If the mixture is getting dry, add a little of water to dissolve the product again. If the mixture is too liquid, use the other side of disc and buff again the surface, drying the liquid excess. Once the surface is dry and shinny, vacuum it and rinse with clean water.

HAZARD IDENTIFICATION

Danger Indications: The product is not classified as hazardous within the meaning of Regulation (EU) No 1272/2008.

Precautionary statements: In normal use conditions and in its original form, the product itself does not involve any other risk for health and the environment. Keep out of reach of children. Read label before use. IF SWALLOWED: rinse mouth. Do NOT induce vomiting.

Keep out of reach of children. Do not eat. Keep only in the original container. Restricted to professional uses.
